## NEWSLETTER

Hello to all boat owners.

The boating season is fast approaching and I guess you will be thinking about the fine weather and the long days that go with summer.

You will need to have your yacht or powerboat ready for action by undertaking any maintenance that is required, so as to have safe and happy boating over the next 12 months. H&M Pascoe Boat Builders Ltd, in conjunction with the services provided by the Whitianga Marina Society, can assist you with a range of services that can help you with your mission. We are a long established business with qualified skilled staff capable of the following services. This business has been operating as a family operation for over 50 years servicing both the working and pleasure fleet.

## SERVICES

### • Timber & Fibreglass repairs.

Two of our team are fully qualified boat builders with a wide range of experience in both traditional and modern methods of boat building and repair.

### • Marine Painting.

This operation has over 20 years experience in marine spray painting including protective coatings on steel vessels as well as timber and GRP.

### • Antifouling.

All our antifouling is applied by airless, which is the preferred method by the marine industry for the customer to get the most value for their money with regards to the performance and life of the coating. As this is a core part of our business and we have been doing this for the past 14 years at the Whitianga Marina hardstand, we can proudly say we are experts in the field.

Left to right

Mitch Pascoe, Prie Morley, Phil Agat,  
Sue Agat, Karl Storey and Phyl Foster

## SERVICES

(continued)

### • PROPSPEED

We are the area approved applicators of PROPSPEED which has set the industry standard for self cleaning coatings on props, shafts, struts, rudders and trim tabs.

### • Boat Valet and Washing.

Our team can wash your vessel with a hot wash which removes the dirt and grime that cold water can't remove. We can then polish your vessel, using Meguiars products, to restore and preserve the gloss in the paint or gelcoat. Our team can also wash and polish your vessel at regular intervals to maintain it in a clean, presentable condition. We can also clean the interior of your vessel if requested.

### • Paint and Marine Hardware

We stock a range of brands and colours of the popular antifouling paints so that if you desire you can antifoul your own vessel.

We stock Meguiars polishing products if you would like to polish your own vessel.

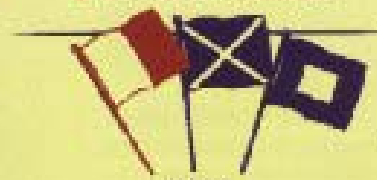

We stock a full range of anodes so that even if you choose to lift and hold your vessel on the Travel-lift we can supply you with replacement anodes.

We stock a range of Jabsco impellers, Rule pumps and float switches, as well as gland packing and other assorted requirements.

We have the knowledge and experience to be able to source anything we don't stock.
